

SPECULUM ANNI, 1662.

Being the *Second* after Bissextile or Leap-year.

OR, AN

A L M A N A C K

Fitted both for *Sea-men* and *Land-men* :

Wherein is contained

The places both of *Sun* and *Moon*, and a *Tide-table*;

And also, the *Terms*; and the *Fairs* happening in
in *England* and *Wales* in every month of the *Kalender*;

Allo, the quarterly *Ingresses*, and *Eclipses* this year.

With a *Guide* for *Travellers*, and other necessary
Tables, the like not hitherto published.

*When Birds do flie, most men observe the same;
To please all sorts I'me fitted with a Name:
And if so be, my Book do please most men,
You may be sure, next year I'll write agen.*

Calculated for the Meridian of *L O N D O N*.

By *T. BIRD*, Philo Mathematick.

Astra regunt homines, sed Deus astra regit.

London, Printed by *E. Cotes* for the Company of Stationers.

The Terms with their Returns this Year.

1662.

Hilary Term begins January 23. ends February 12.

And hath 4. Returns.

Octa. Hill. Jan. 20. } } Crast. Purif. Feb. 3.
Quin. Hill. Jan. 27. } } Octa. Purif. Feb. 9.

Easter Term begins April 16. ends May the 12.

And hath 5. Returns.

Quind. Pasc. Apr. 14. } } Mens. Pasc. Apr. 28.

English beat the Spaniard	5
The happy return of our gracious K. Charles the II.	} 2
into England	
His famous Coronation	1

Since

A Table for Buying and Selling by the Hundred weight.

Farthings.	q;	Hund.		Tun.		
		S.	D.	L.	S.	D.
1	1	2	4	2	6	8
2	2	4	8	4	13	4
3	3	7	0	7	0	0

Pence	d.	Hund.		Shillings	S.	Hund.	
		L.	D.			L.	D.
1	1	0	4	1	5	12	0
2	2	0	8	2	11	4	2
3	3	1	0	3	16	16	0
4	4	1	4	4	22	8	0
5	5	2	8	5	28	0	0
6	6	2	0	6	23	12	0
7	7	3	4	7	39	4	0
8	8	3	8	8	44	16	0
9	9	4	0	9	50	8	0
10	10	4	4	10	56	0	0
11	11	5	8	22	112	0	0

Buying and Selling by the hundred weight are easily done by this Table: As, farthing the pound is 2. shillings 4. pence the Hundred, and 2. pound 6. shillings 8. pence the Tun: So likewise 3. pence a pound, is 1. pound 8 shillings the Hundred; and 1. shilling a pound, is 5. pound 12. shillings the Hundred Weight.

A Tyde

A Tide Table shewing what Moon makes a full Sea in these places following.

South	D	Quinborow, Southampton, Portsmouth, Ile of Wight, Beachy, the Spits, Kentish Knock	H.	M.	H.	M.

S. by East.		Rye, Winchelles, Gorend, Thames mouth,	11	15	3	45
N. by W.		Fair Ile, Rhodes.				

Note that the first column of figures in this Tide table, shews you the hour and minute of high-water at the change and full D: and the second column shews you the time of high-water, when the D enters her quarters of those places the figures stand against.

At the
Quarters.
At Change
and Full

Dayes after the Change or Full Moon.

1.	2.	3.	4.	5.	6.	7.
H. M.	H. M.	H. M.	H. M.	H. M.	H. M.	H. M.
0 45	1 25	1 55	2 25	2 55	3 30	4 10

Dayes after either of the Quarters.

1.	2.	3.	4.	5.	6.	7.
H. M.	H. M.	H. M.	H. M.	H. M.	H. M.	H. M.
0 55	1 55	3 04	5 5	10 6	10 7	10

The use of this with the foregoing Tide Table.

First find the New Moon, Full, or Quarters, in the Kalender, then count how many dayes are past either of those, and under the same number of dayes past, you have the hour and min. that you must add to the hour and min. that stands against the Haven or Port you desire, and that gives you the time of high-water at that Haven; but observe alwayes that if the two sums added together make above 12. hours, you must cast away 12. hours, and the remainder is the time of high-water.

Also note, that the hour and min. under the title of *Dayes after the Change or Full*, are to be added to the hour and min. in the first column of the Tyde table, if the time of high-water you seek for be after the Change or Full, but if after either of the Quarters, then the hour and min. under the title of *Dayes after either of the Quarters*, is to be added to the 2d. column in the Tide table, and that gives you the time of high-water.

Example, At London, *January* the 6th. that is, 4. dayes after that last quarter, in this Table above, under 4 dayes past the quarters, I find 4. ho. 5. min. then against London, I take the 2d. column, because 'tis past the quarter, and there I find 7. ho. 30. min. to which I add the 4. ho. 5. min. and they make 11. ho. 35. min. which is the time of high-water there, and at *Tinmouth, Hartle-pool, &c.*

Vulgar Notes.

The *Julian* or old
Account.

1662.

The *Gregorian* or
new Account.

	10	The Golden Number	19
	19	The circle of the Sun	19
	20	Dominical Letter	A
	15	Roman Indiction	15
	20	Epaet	10
January	26	Septuagesima	February 5
February	12	Ashwednesday	February 22
March	30	Easter day	April 9
May	4	Rogation Sunday	May 14
May	8	Ascension day	May 18
May	18	Whitunday	May 28
May	25	Trinity Sunday	June 4
November	30	Advent Sunday	December 3
		Sundayes after Trinity 26.	

Note that the *Roman* Account begins 10. dayes before ours, so that the 11. of their Month is the first of ours, and the 20. of their Month is the 10. of ours, &c.

The *John A Baptist*, thunders these Feasts down,
For to advance his Dipping-dayes in'th room.
The *Presbyter* doth execrate our Mother
Church; cause she'l not own the Chanpling brother.
Thus do those giddy zealots, *Hob*, and *John*,
Reject the Roast-meat, for a sop in'th pan:
And do forsake the Font, and Common-prayer,
For *Jordan*, and their Oraisons of Air;
Are not these happy times, (thus wheel'd about)
That keep the Brethrens lamps from going out?
Yes sure they are: And wondrous happy be,
Those Coblers of (our) Christianity.

January hath XXXI. dayes.

Old *Janus* bids thee keep thy body warm,
And with good Diet, thy diseases charm.
Drink wholesome Wine, and keep in exercise
Thy body now, if thou'dst be counted wise.

January 1662.

Last quarter the 2. day, past 12. at noon.

New Moon the 10. day, past 4. in morning.

First quarter the 16. day past 11. at night.

Full Moon the 24. day, past 5 in morning.

Fixed Fairs in England and Wales.

The 3d. at Lambith, the 5th. at Hickford in Lancashire, the 6th. at Bristol, and at Salisbury, the 7th. at Langinny, the 25th. at Bristol, Churchingford, Gravesend, the 31. day at Landysell.

Let honest *Hob*, observe these choiser dayes,

And lade his Ass with fairings (if he please)

That *Joane* his Wife may welcome him at night.

With ah my dear, thanks for my fairing bright.

For Pleasure (oftimes) in a merry sort,

Delights the Countrey, as it doth the Court.

Note that the Sun rising is set in the vacant places among the Sundayes and Festivals: If you desire to have the Sun setting, you need but subtract his arising from 12. hours, and the remainder is Sun setting.

February hath XXVIII. dayes.

Be sure bleed not, unless occasion urge,
Be wary how thou Vomit, Sweat, or Purge :
Beware also, of vain Excess or Riot,
Be sure observe a seasonable Diet.

February, 1662.

Last quarter the first day, past 9. 1th morn.

New Moon the 8. day, past 4. afternoon.

First quarter the 15. day, past 8. before noon.

Full Moon the 22. day, near 11. night.

Fixed Fairs in England and Wales.

The first day at Broomly in Lancashire, second day at Bath, at Bicklesworth, Bugworth, Faringdon, Godlemew, Lyn, Maidstone, Beckles-field, De-vises, Whitland, 3. day at Boxgrove, at Brimly; 6. day at Stafford for 6. dayes together, for all kind of Merchandise.

The 8. day at Tragarton, 9 day at Landaffe, 14. day at Owndle in Northamptonshire, Feversham, 24. day at Baldoc, at Bourn, at Froom, Henly upon Thames, Highams-ferry, Tewxbury, Upingham, Walden.

26. day at Stamford, A Horse Fair.

Else you may observe this Rule for sun-setting.

Note how much the Sun riseth after

8. 7. 6. 5. 4. or 3.

So much he sets before

4. 5. 6. 7. 8. or 9.

Example,

February the first, the Sun riseth 14. min. past 7. then according to this rule abovesaid, he sets 14. min. before 5. &c.

March hath XXXI. dayes.

*March comes in blustering, like a Lyon bold,
And ushers in the Spring with wet and cold :
But like a Lamb, he mildly makes his exit,
Leaving good weather, 'tis my ipse dixit.*

June hath xx. dayes.

Go hunt the Hare, the timorous Buck pursue;
 Bid idleness, and sullen sloth adieu.
 The careful man, that doth intend to thrive,
 Will like the Bee, bring honey to the hive

This Table is easily understood, and may serve sufficiently (with addit'on) for all sums whatever, and times likewise; Example, I would know what interest 1000 l. comes to in a Month; I find one thousand in the first Column, and over against it under the first Month I find 5 l. which is the true value of it for one Month; and if you guide your eye forward, you will find its true interest for six Months to be 30 l. which doubled, will amount to 60 l. in twelve Months; do so in the rest, and you cannot fail.

- Δ. Gibbosa, the Moon three parts full of light.
- ⊙. Plenilunium, the full Moon.

The moveable Fairs in England and Wales.

At Northallerton every Wednesday from Christmas till June. At Hinckley in Leicestershire three Munday after Twelfth day. At Melton Mowbray, the Tuesday after Twelfth day, and a Horse Fair at Salisbury. Thursday after Twelfth day at Banbury, also at Leicester and for three Thursdays after. On Friday after Twelfth day at Leicester field.

On Shrove Munday at Newcastle under line.

On Ash Wednesday at Abingdon, and at Cambden in Gloucestershire. Ciceter, Dunstable, Eaton Exeter, Peckingham, Litchfield, Roston, Tamworth, Tunbridge. For three days in Lent at Banbury. On the first Munday in Lent at Chichester, Winchester. First Tuesday in Lent at Bedford. Munday after Midlent Sunday, at Oakenham, Saffron Walden, Stamford. Friday and Saturday after Midlent at Harford. Munday before Lady day at Donbigh, Kendal, Wisbich, Munday after the fifth Sunday in Lent at Grantham. Hexome, Salisbury, Sudbury. Wednesday before Palm Sunday at Drayton, Thursday before at Llanfildil, on Saturday before at Alisbury, Leicester, Newport, Pontfract, Skipton, Wisbich, Munday after Palm Sunday at Billingworth, Kendal, Llandawren, Worcester. Wednesday before Easter at Kettering, Llangwilliams. Thursday before Easter at Kettering, Sudminster. On Good Friday at Adon-Burnel, Amstith, Bishop's Castle, Braton, Bury Chareing, Enfield, Gildford, Hinningham, Ipswich, Longwer-Mellain, Nulley, St. Pombs, Risherough, Ro-

theram. Munday in Easter week at Gainsborough, O-
 nay, Dryfield. Easter Tuesday at Ashby, Brail, Dain-
 try, Hitchin, Northfleet, Rochford, Sandwich. Easter
 Wednesday, at Beverley, Willingborough, Easter Friday,
 at Darbigh; On Saturday at Skipton on Craven,
 Munday after Low Sunday, at Bickleworth, Evesham,
 New Castle underline; third Munday after Easter at
 Edith, Beverley, Enfield, Rech. On Ascension Eve at
 Darkin. Abargaly. On Ascension day, at Bewmorris,
 Bishop-straiford, Bradsted, Brumingham, Bridgnorth,
 Burton on Trent, Eccleshal, Kidderminster, Middle-
 wick, New Castle-Rippon, Stopport, Sudminster Vizes.
 Munday after Ascension day at Bursington. Wednesday
 after, at Shrewsbury. Friday after, at Ruthin; On
 Whitsun Eve at New Inn, Skipton on Craven, Wisbich.
 On Whimunday at Erib, Kerby, Lumbum, Ratdale,
 Ryhil, Salubury, Agmondsham, Amerson, Appleby,
 Bickleworth, Bradford, Bromyard, Burton, Chichester,
 Cokermouth, Dorington, Exeter, St. Ives, Rygate, Shal-
 ford, Shetford, Midlome, Whitchurch, Dryfield; On
 Whitsun Tuesday. at Ashby, Canterbury, Daintry, Ey-
 ring, Faringdon, Laiton Buzzard, Lew. s, Milford,
 Melton-Manbray, Midhurst, Monmouth, Rochford.
 Whitsun Wednesday; at Lock, Newark on Trent, Roy-
 ston, Sandbar; On Thursday at Cakesfield, Kingston.
 Friday at Cockshal, Darby; On Trinity Eve, at Pom-
 fraet, Skipton on Craven; Trinity Munday at Houn-
 slow, Southcote, Stockdr, Creswell, Raily, Spisby, What-
 ford Tunbridge; Tuesday after Trinity, at Abergany,
 Radnor; On Corpus Christi, at St. Annes, Banbury, Bi-
 shop

shop-Stratford, Breminham, Egglefrew, Haligh, Kid-
derminster, Neath, Newport, Prescote, St. Eides, New-
bury, Hampsted, Rosse; Friday after Corpus Christi, at
Coventry, Chepstow. Munday (next) after at Belton,
Stamford; Munday after the 3d of July at Haverib
Munday fortnight from Midsummer at Foringday,
Munday after Bartholomew, at Sanbich; Munday after
Michaelmas at Fasby, St. Faiths, Tuesday at Salisbu-
ry, Thursday at Banbury, Friday before Simon and
Jude at Leichfield.

Note that in this Table the Fairs that were
wont to be kept on Sundays, are now transferred
to the Munday following, as they are in all parts of
England and Wales kept and observed.

A Geographical Table.

Shewing the distance of the chiefeft Cities in Eng-
land one from another, with the ready way
unto them, useful for Travellers.

From York to London 150 miles.

To Tadcaster 8. Wentbridge 12. Doncaster 7. Tux-

To *Dunstable* 8. *Northampton* 10. *Higham ferry* 10. *St. Eides* 8. *Cambridge* 12 m.

Thus have you the travellers table much corrected, which I hope will be very advantageous to all those that shall have occasion to make use thereof.

Of the Spring.

THe Spring initiates when the great Lamp of Heaven toucheth the first point of γ , or the Earth \sphericalangle , which hapneth this year on *March* the 10 day at 30 minutes past 6 a Clock in the morning. The quality of this season is hot and moist, and of the humors hath affinity to sanguine; therefore the *Egyptians* in their Hieroglyphicks were used to paint the Spring like unto a green flourishing youth; for indeed at this time every thing begins to flourish, both Men, Beasts, Vegetables, and Minerals.

*The nimble Choristers do sing
Dance the earth Vesta's glory in the spring.*

This year in some respects is like to be better to us then the last was (and in some worse), Trading is like to be indifferent good, Δ in Δ h if sicknesses prevent not people in their callings: and money not so scarce amongst us as it was last year. Lord of the Δ d on the Ascendant. But it seems to me to be a very great time of sickness and mortality amongst us, so that, *Lord have mercy upon us*, may well be set upon the figure of \odot ingress into \vee many diseases are so occult, that Physicians can scarce find their nature, or how to cure. Many children die, and women in childbed. Many Sea-fights this year, and we of the *English* concerned therein. The sign of the Solar Eclipses in 1661. ascends in this Revolution, and δ in the Ascendant of that Eclips; it may go a little hard with our men at first, but at last they win the day. and come off with renown, and our Enemies willing to make peace with us. *GOD bless the KING*, and grant that some in Authority or Command, may not frustrate His Designs, by keeping back the Seamen's pay. None more valiant and ready to do the King's service, then the Seamen, if but well paid. Both Lights in Δ h discovers the Kings false friends, but he must reign *Maugre* all his treacherous Enemies. The Heavens have decreed to make him happy, and

the Nation in him; therefore whosoever doth
 do any thing against him, will but bring ru-
 ne to themselves; for no Plot nor under-
 hand designs against him can prosper. Next
 under God he is ordained to settle the Nation
 in peace, and to be a means to pacifie the
 passions of the people. Let the *Seſtaries*
 know, that there is no fighting against Hea-
 ven's decrees: they prate much of God, and
 of the Scripture; but how came they to for-
 get this Scripture, which the Apostle men-
 tions, *to Fear God and honour the King*, (per-
 haps this is left out of their Bibles) And
 Saint Paul saith, *Let prayers and supplications*
be made for Kings, and all that are in Antho-
riety, that ye may live a gently and peaceable
life under them. But our *Seſtaries* love the
 King so well, that they care not how soon He
 come to that end His Father did. This gene-
 ration of Vipers took *Machiavells* counsell
 very right: for saith *Machiavell*, if thou hast
 a design to go forward with, Religion is the
 best thing in the world to bring on thy design
 to accomplish it: but if thou make consci-
 ence of thy Religion, it is the worst: so had
 they made conscience of their Religion, they
 could

ould never have acted such villanies under
 with the *Scots* through their zeal disturb
 our Peace; If they hatch a new combustion
 they will suffer for it. Let the *Hogen Moger*
 the *Hollander* leave playing fast and loose with
 us; though he prove never so treacherous, his
 designs fail him; he cannot be Lord of the
 narrow Seas. If he fall out with us, let him
 look to be as well beaten as ever he was in his
 life. Many high Winds this year. The
 still continues a sickness among Cattel. What
 I writ last year of sickness and death among
 people and Cattel, fell out too true, to man
 peoples loss and grief. I shall end my dis
 course of this Revolution, and leave time to
 manifest the truth of what I have written.
 Those that will erect the figure of the Revo
 lution, may take it thus; near 18 d of
 ascending, and having the Ascendant, by the
 Table of Houses you may finde the *Cusps* of
 the other Houses; the Planets are thus placed
 ♄ 5d. 25. ♀ R. ♃ 13d. 12 m R. ☿ 15d. 33 ☿ ☉ 0d. 0
 ♁ 7d. 7 ☿. ♀ 16d. 50 ♀. ♃ 2d. 26 ♀. ☿ 4 m.

Of the Summer.

th
1-

THe Summer quarter commenceth when
☊ or the Sun enters the first Scruple
of the Solstitial sign Cancer, or the Cæle-
stial Crab, and this year falls on *June* the 11.
day at 26 minutes past 9 a Clock in the morn-
ing: This quarter is hot and dry, and of hu-
mors it regards the choler, and ripens the
fruits of the earth for mans use.

Yet-----Summer crowns his *cares*
With gilded ear, as yellow as his hair is.

Of Autumn.

Autumn inchoateth when *oculus mundi* the
eye of the World entreth the Cælestial
Ballance or ☐ which is now on *September* the
12 day 28 minutes past 12 a clock at night,
making the day and night of equal length as
in the Spring: the constitution of this quar-
ter is cold and dry, being assimilated to old
age, quite opposite to that of the spring:
of humors it respects the melancholick
that

that being the nearest related to the ear

*He that intends to eat some Christmas che
Must Annums fruits in vain excess forb*

Of the Winter.

Solstitium Hyemale, or the Winter Solsti
beginneth when the heavenly Giant begin
to mount the Goat, or Capricorn, whi
this year will be *December* the 11. day, 7. m
nutes past noon.

This season is cold and moist, and is call
Hyems (i.e.) Winter *magis rō dō* to Rain. An
Frigida Hiberna & gravedus nive nubilus æther

*In Winter season oft doth rise
Great snows and frosts, with cloudy skies.*

And in this quarter the Sun withdraws his
beams most of all from us, and cast his rays
but obliquely on us here living on this side the
equator. So it follows the crassitude of the
air is greater, by reason the quantity of beams
are fewer; for it is the absence of the Sun
that leaves us in a Cimmerian darkness or ob
fcurity.

The *Cimmerii* are a people of *Italy*, dwelling in a valley near the mountain *Pausilip*, so virol'd with hills, that the sun never comes it; hence the proverb of Cimmerian darkness, where *Quid* placed the Pallace of *mnus*.

Est prope Cimmerios longo spelunca recessu,

Mons cavus &c. ---- Met. Lib. II.

Thus Englished by the *A. of Glossographia*.

A Cave there is, near the *Cimmerians* deep,
In hollow Hill the mansion of dull sleep,
Never by *Phabus* seen; from earth a night
There of dim clouds ascends, and doubtfull
(lighr.

This season the people abound with
hlegm, the element of water being assimilated
creunto; of mans age it regards the decre-
t, &c. And thus much for quarterly in-
esses.

Of Eclipses this year.

The inhabitants of this terreneal star, may
observe two Eclipses this year; they are both
the Sun, but neither of them visible to us.
There

There is no Lunar Eclips this year.

The first Eclips of the Sun is on the 10th of *March*, about 2 a clock in the morning it may be seen beyond the line, about great Islands; near *Nova Guinea* its total. It may be observed in the Island *Sumatra*, *Bornio*, *Java's*, and in the *Lucas*, *Beach*, and *Mile* Kingdom; but less in quantity.

The second Eclips of the Sun is on the day of *September* at noon, but not visible us, in respect of the Moons Parallax: but great Eclips in *Guinea*, a Region of *Africa* about *Gabo*, *Modinga*, *Gubar*, and some places near the *Black River*; this almost total.

*My Book, upon the stage go take thy flight;
Some will thee buy, though others do thee slight
For fate doth rule o're all things on this Ball:
Some do prize Birds, and others not at all.*

*Thou'lt have thy lot and chance among the rest
After thy freedom, when thou hast been prest*

But I know experimentally,
Pro captis Liboris habent sua fata libelli.
Books either fail or hit
By'th scale o' th Readers wi:

Of the 12 Signs natures.

♈ ♎ ♊ Are of the fiery triplicity, and are hot and dry: cholerick.

♋ ♌ ♍ Are of the earthy triplicity, and are cold and dry: melancholick.

♊ ♋ ♌ Are of the airy triplicity, and are hot and moist: sanguine.

♋ ♌ ♍ Are of the watry triplicity, and are cold and moist: flegmatick.

The use whereof is this, that people born under such or such a Sign, participate thereof; and the nature thereof remains on them as you see, some people are cholorick, some melancholy, others sanguine, and other some flegmatick.

Of the Planets nature.

Saturn is a Planet cold and dry, Diurnal and Masculine, and is near 30 years runing in his revolution.

Jupiter is a Planet hot and moist, Masculine and Diurnal, and finisheth his course in 12 years.

Mars is a Planet hot and dry, Masculine Nocturnal, and makes his period in 2 years.
The

The *Sun* is hot and dry, Masculine and diurnal, and finisheth his circuit in a year.

Venus is cold and moist, Feminine and nocturnal, and revolves in a year.

Mercury is convertible in nature, that is Masculine with the Masculine Planets, and Feminine with the Feminine Planets, and finishes his circle in a year.

The *Moon* is cold and moist, Feminine and Nocturnal, and makes her revolution in a month.

Of the year and its parts.

THE Solar year consists of 12 Months, as is shewn in the Kalender; the Lunar year hath 13 Moneths in it, viz. four weeks in a Moneth, either of them have 365 days in a year, just as many as there are veins in a mans body; in the Leap year it hath a day more.

The year hath 8766 hours in it after the *English* account, but if it be *Byzantine*, it hath 8790 hours.

For the several quarters of the year, as they are noted in the preceding Prognostication.

Deo gloria.
